Wake Up.... Time is Calling You (public programme)
Dadi Janki Interview With Dadi Janki

Q. Dadi, there is an urgency we see in you to wake us all up. Why do you feel the need for us all to totally come alive now?

A. I would like to say that there is not even time to answer such questions! We should just get on and do it. I never ask God any questions. Neither should you; just get on with it! Whatever it is I want to do, let me do it now. I would like to tell you the the same thing as Brahma Baba told me 68 years ago; there isn't going to be another Diwali. Now think and live as if there isn't going to be another Diwali. My lifespan has increased, God has given me this time and chance to do service. There is a sense of urgency because; if I change others will change.

Q. All of us have busy lives. How can we really find peace?

A. It is only lazy people who use the word busy!. If someone is careless they use the word 'busy'. Don't keep the words 'how, what, when and why in your dictionary'. If you have all these questions in your mind they will come in your vision, your words and your relationships. In fact all these things are very simple so don't make them complicated. The intellects of human beings across the world are tired, people's hearts are broken. All of us have peace, love, happiness inside. Now we need to use these things...

Q. Dadi, explain to us the power of silence.?

A. There is peace, silence, sweet silence and dead silence. First become peaceful inside; change your peaceless nature. This will happen if you practice going inside in silence. To go into silence means to stop your thoughts go in many directions. Let me become introvert, turn inside and accumulate the power of silence. When I was very young electricity came to our town. Suddenly one day we could just press a button and the light would come on. It is possible now for us just to press a button and to see God. If I want to experience silence I musn't allow what I see around me to infiltrate my mind. If it comes in, send it away. Be peaceful, be loveful. This is, in fact, easy. Learn how to make your mind quiet and you will be able to smile from within. Be your own friend, make God your friend and your silence power will increase. Don't spend that power; accumulate it. If I am making a noise how can I hear God? If I am caught up in material consciousness, God is far away because he doesn't have a physical form. Let the mind be absolutely stable in the consciousness of One. Not only will I then receive help from God but an atmosphere is also created whereby others automatically get help. Firstly I need strength and then I can take God's power; I can then have energy. The power of knowledge gives me that strength. I have to accumulate energy in my head and heart just as solar energy is stored. I take power from up above and then it is as if I am not spending my own energy.

Q. Dadi, explain more to us about time and what your vision is for the future.?

A. Over the past thirty years I have seen so much change in the world. Who changes it? Human beings. They give their thoughts, time and energy to change the world. However, this world has now become one without a trace of truth. This is now the time for liberation from worry. Learn the method to change whatever is negative and make it positive.

Dadi Gulzar shared with us the vision of the Golden Age. We can create that type of world now. In fact if we want, we can change the world overnight because when I change, the world changes. Technology is changing very fast and human beings can also change very fast; they can transform instantly if they want. In the past few months I feel that we are seeing a big change. Some of you have been here for twenty years and say 'I will do it... after thinking about it'. Some of you listen for a few hours and it is clear that you are changing and intend to continue to change. Nowadays many have very bitter chains of desires and attachments. I must leave those things and then forget them. When everything is right you will become very light and you will experience being powerful .

We mustn't criticize, come into corruption or get involved in competition. To criticize is actually a sin. Let me do such actions that I receive blessings from everyone's heart. I will then feel that I can have good wishes for everyone. The right time has come, God is giving you all the opportunity and you are able to create your own fortune. Now ask yourself; Has the time come for me? Did God hear me? Has my fortune opened up? Make everything come together with determination and see how everything happens with just a snap of your fingers.
